GR8 KIDS

Nutritional Power Sticks

ADDITIONAL DETAILS

Every stick of GR8 KIDS contains the natural plant-derived vitamins (phytonutrients) of 4.5 servings of whole food fruits and vegetables. Because our bodies have evolved to utilize this form of vitamins, they are highly bioavailable to our bodies and our bodies can use them with high efficiency.

The difference in nutrients from whole foods versus synthetic vitamins is night and day. Whole food derived vitamins are in their complete form and are much more bioavailable and usable by the body.

A good example is Vitamin C. Most Vitamin C supplements contain only Ascorbic Acid or a less acidic version called Ascorbate. But Ascorbic Acid is NOT Vitamin C. It only represents the outer ring that serves as a protective shell for the entire Vitamin C complex. Real Vitamin C found in whole foods also contains Bioflavonoids, Rutin, Factor K, Factor J, Factor P, Tyrosinase, Ascorbinogen, as well as Ascorbic Acid.

When you take only Ascorbic Acid found in synthetic Vitamin C tablets or powders, your body must extract all the other components of the full Vitamin C complex from the body's tissues in order to make use of it. But if your body does not have adequate reserves of the other components, Ascorbic Acid itself does not provide any of the health benefits that the full Vitamin C complex does; so your body just eliminates the unused Ascorbic Acid through your urine.

The Whole Food Nutrient Blend in GR8 KIDS captures the complex nutrients and phytonutrients from fresh fruits and vegetables. It is 100% natural and derived from whole food plants.

GR8 KIDS is nutritionally dense; has optimum bioavailability and biosorption; and has a high uptake into the body – making it a great, healthy supplement for the body to use. Plus, it is shelf stable and involved no chemicals, synthetics, or excipients in processing.
