

REGENER8

Turmeric Curcumin Chai Tea

ANTI-AGING & ANTI-INFLAMMATION

A delicious, simple way to enhance your health and longevity! REGENER8 is a research-supported anti-aging and anti-inflammation turmeric curcumin chai tea that not only helps you look and feel great but also tastes amazing and is good for you.

REGENER8 contains BioBDMC™ – a patented anti-inflammatory, naturally extracted turmeric extract curcumin that provides relief from pain, swelling, and other common ailments associated with systemic inflammation. It also contains a high-quality collagen protein for added restorative health benefits, including improving the look and overall health of skin, hair, and nails and promoting bone, joint, and tendon health.

Our luscious REGENER8 chai tea flavored health supplement drink mix is sugar-free and gluten-free, has only 5 calories per serving, and tastes great served cold or warm. It is sweetened by Glyvia™ – a natural zero-carbohydrate sweetener that tastes like sugar but without the calories and blood sugar spike; and has been found to help curb appetite and carb consumption.

Enhance Health & Longevity!

BENEFITS MAY INCLUDE:

- Support Anti-Aging and Immune System Efficiency
- Relieve Joint Pain and Chronic Inflammation
- Help Preserve Healthy Bones and Joints
- Strengthens Skin, Hair, Nails, and Connective Tissue
- Assist in Appetite Suppression and Blood Sugar Control

PRODUCT DETAILS:

- Turmeric Curcumin Chai Tea Health Supplement Drink Mix
- Sugar-Free, Gluten-Free, and Only 5 Calories per Serving
- Fast-Acting and Bioavailable; Works in Hours (Not Days)

REGENER8

Turmeric Curcumin Chai Tea

RESEARCH FINDINGS

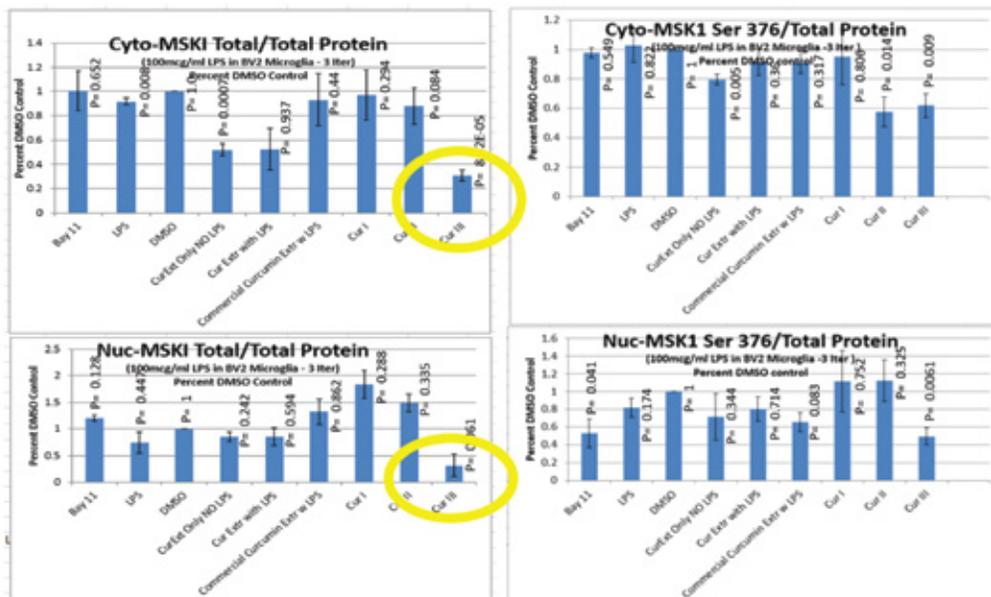

Curcumin BioBDMC™ performs as much as 14 x better than Ibuprofen and Aspirin

Curcumin BioBDMC™ is a patented pharmacology delivered by a novel research-supported mechanism that is peer-reviewed and published. It has been shown to work as much as 14 x more effectively than Ibuprofen and Aspirin (ASA). What's more, Curcumin BioBDMC™ works faster (in hours) instead of days (like regular curcumin 95% does).

Basic pharmacology of regular curcumin 95% versus Curcumin BioBDMC™

Curcumin BioBDMC™ inhibits two key regulator proteins (NF-kB and MSK1) in the inflammatory pathway. Regular curcumin (even the 95% variation) can only inhibit one of these (NF-kB). Curcumin BioBDMC™ inhibits a second key protein (MSK1) involved in activating inflammation. Regular Curcumin of many types tested and displayed in the same graph cannot inhibit (stop) this protein (MSK1). Ultimately, Curcumin BioBDMC™ inhibits two key proteins (MSK1 and NF-kB) while regular curcumin 95% only inhibits one of these (NF-kB) as is commonly known to be its anti-inflammatory mechanism.

REGENER8

Turmeric Curcumin Chai Tea

ADDITIONAL DETAILS

REGENER8 contains BioBDMC™ – a patented anti-inflammatory, naturally extracted turmeric extract curcumin that provides relief from pain, swelling, and other common ailments associated with systemic inflammation. It has been shown to work as much as 14 x more effectively than Ibuprofen and Aspirin. Many high-quality studies show that turmeric has major benefits for your body and brain. It has powerful anti-inflammatory effects and is a very strong antioxidant. Curcumin is a bioactive substance in turmeric that fights inflammation at the molecular level, which is important in preventing and even treating diseases. Turmeric also has potent antioxidant effects; it neutralizes free radicals on its own as well as stimulates the body's own antioxidant enzymes.

For added health benefits, REGENER8 also includes high-quality collagen protein, which can improve the look and overall health of skin, hair, and nails and may also help promote bone, joint, and tendon health. Collagen may help slow the effects of aging, such as by restoring skin moisture, reducing wrinkles, and improving elasticity, tone, and vibrancy. It also plays a role in joint, tendon, and bone health. There is some evidence to suggest collagen supplements may also help increase muscle mass, prevent bone density loss, and relieve joint pain.

REGENER8 is sweetened by Glyvia™ – a natural zero-carbohydrate sweetener that tastes like sugar but without the calories and blood sugar spike. It has a zero glycemic index, so it does not raise blood glucose levels in the body. In addition, it provides a research-supported pharmacology to assist insulin activity and blood sugar clearance. It has also been found to help curb appetite and carbohydrate consumption.
